NEW PRINTING TECHNOLOGY

SKIN

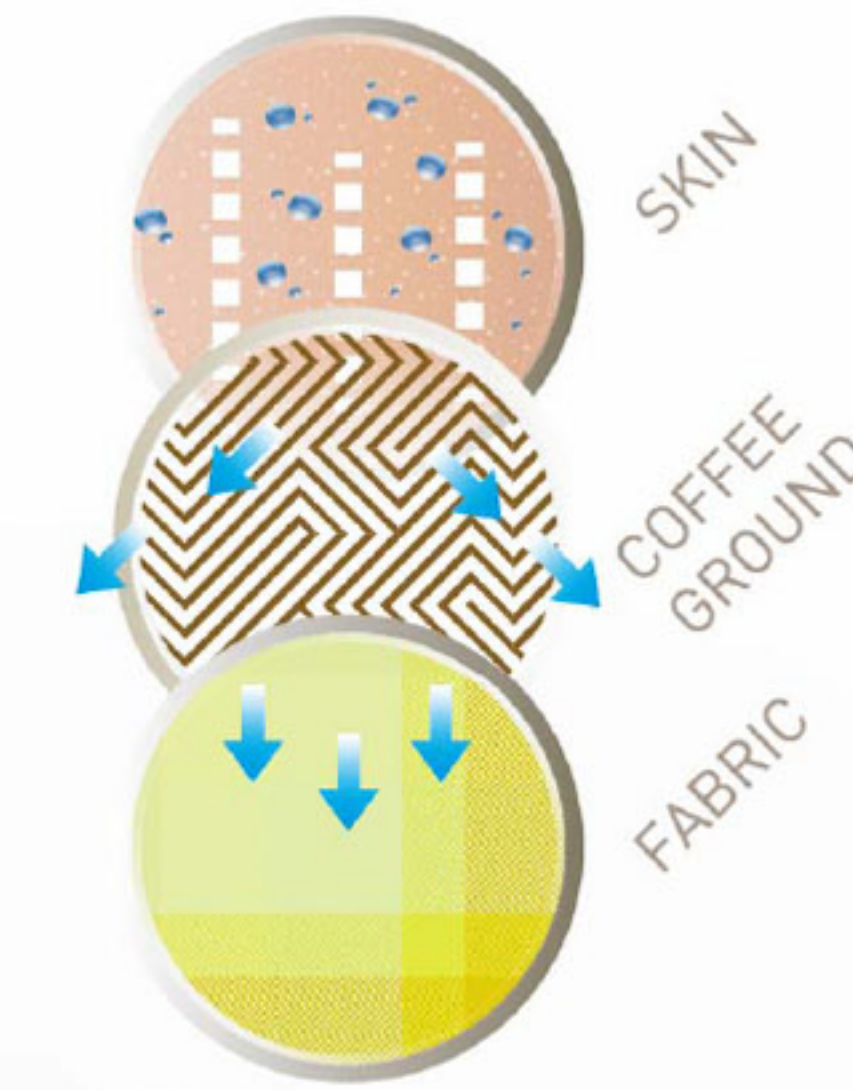

Sweat goes along
with P4DRY™ print

WHAT IS P4DRY™?

P4DRY™, a proprietary printing technology developed by SINGTEX®. This technology incorporates S.Café® coffee grounds to create a new level of print and applies to layer fabrics. Quicker fast drying, superior odor control, and gentle to your skin, P4DRY™ offers you a whole new level of wearing experience.

Dry Touch

As the moisture enters from the skin surface into the fabric, P4DRY™ transfers the moisture quickly to the surface of fabric. The main benefit is that your fabric remain dry at the same time.

Odor Control

S.Café® Technology remains in P4DRY™ which is constantly absorbing odor, so your fabric will not smell any time you are wearing it.

Dropping Condensation Rate

P4DRY™ increases the speed of transferring moisture from skin surface, and this allows the moisture condensation rate to drop significantly.

Eco-Friendly

The printing material of P4DRY™ comes from S.Café® coffee grounds, another fascinating way to give spent coffee ground a new life.

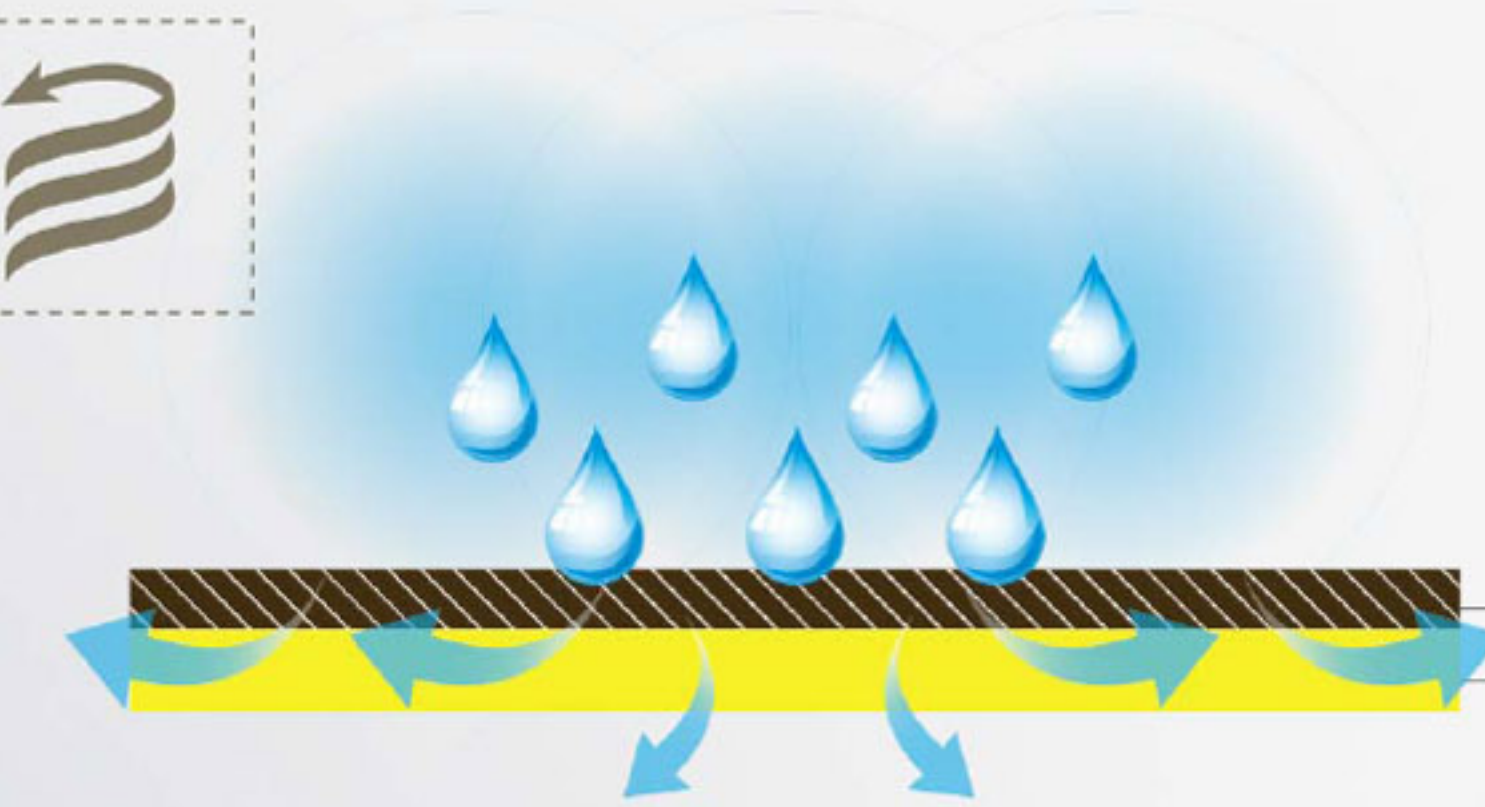

UNIQUE FEATURES

Odor Control

Fabrics with P4DRY™ increase 80% of odor control capability than those without it.
ASTMD 5742 Test Method

80%
+

Dropping Condensation Rate

P4DRY™ helps to reduce the moisture kept on the skin surface by up to 30%.
